

Product Data

Application Method - Stretch fit

Manufactured from OSLF silicone, LFM cable markers have great resilience and elasticity and retain these properties over a wide temperature range. While normal operating temperatures can be as high as 200oC, LFM cable markers will remain flexible at temperatures as low as -65oC

- Fluorinated for high fluid resistance
- Excellent Colour Fastness
- High Performance Print Technology
- Outstanding Electrical Insulation
- Available in 11 Colours
- Conforms to BS4G198 Type 3
- Conforms to Def. Stan. 59-15 Type D4
- Printing to Customer Requirements

Characters can be printed in single or multi-lines of any length, from once to multiple times round the sleeve, in horizontal, vertical or variaxial (combination of horizontal and vertical) formats.

APPROVALS & STANDARDS	PROPERTY	VALUE
BS4G198 Type 3	Temperature Range	-65oC to +200oC
Def. Stan. 59-15 Type D4	Colour Fastness	Standard 6 minimum
NSA 937201MA	Flammability	Self extinguishing (fitted)
PAN 6490 Style C	Tensile Strength	8.0 MPa minimum
	Elongation at Break	350% minimum
	Chemical Resistance	Good
	Resistance to Mould Growth	BS2011 pt. 2.1J
	Proof Voltage	8kV per 1mm wall thickness
	Insulation Resistance (Dry)	10,000 Megohms minimum

Ordering Information

LFM Cable Markers are usually stretch fitted using a sleeving tool. Radial stretch while fitting is up to 4 x nominal bore, when fitted up to 2 x nominal bore.

Approval Standards

Manufactured to meet:

BS4G198 Type 3

Def. Stan. 59-15 Type D4

NSA 937201MA

PAN 6490 Style C

PRODUCT REFERENCE	NOMINAL BORE ID Ømm	NOMINAL WALL THICKNESS mm	LENGTH	COLOUR CODE	FORM
LFM05/05	0.5	0.5	Any length to nearest mm to accommodate marking	BK=Black	Numeric, alphanumeric, alpha characters as well as instructions, symbols, tables and even logos. Single or multi-lines of any length, from once to multiple times round the sleeve.
