## SLEEVING TOOLS

### Expanding Tools for sleeves and markers.

Sleeves and markers manufactured from Silicone and Neoprene generally need to be stretched while fitted. The range of 3 and 4 prong sleeving tools, information shown below, will suit most applications.

#### **YP1:**

Plated 3 prong tool for sleeves 3mm to 8mm diameter.  
Length of prongs: 40mm (1½")

#### **YP2:**

Plated 3 prong tool for sleeves 2mm to 5mm diameter.  
Length of prongs: 35mm (1 3/8")

#### **YP3:**

Plated 3 prong tool for sleeves 1mm to 2mm diameter.  
Length of prongs: 20mm (3/4")

#### **SO4:**

Plated 4 prong tool for sleeves 15mm to 24mm diameter.  
Length of prongs: 50mm (2")

#### **STS 1:**

A comprehensive sleeving tool set comprising one YP2 body and one set of prongs from each of the YP1, YP2 and YP3 tools. 1 Allen Key and 1 bottle of Solube are also included.

#### **MAJOR:**

Plated 3 prong tool designed for heavy duty use and for sleeves 3mm to 10mm I/D.  
Length of prongs: 40mm (1½")

All component parts are replaceable

#### **SOLUBE:**

A lubricant suitable for use with tools described above. Sold in plastic bottles containing 225ml or 500ml. State which required.
